2020 FALL NEWSLETTER

OUR WAY OF SAYING

To All of our Valued Patient Guests:

2020 has been a crazy year for everyone in the world!! It has been an especially challenging one for us at work. We experienced our first extended office closure ever to help us monitor the rapidly changing nature of COVID-19 and ensure how we could best keep you and our team safe. Since our re-opening in May and beyond, we have served hundreds of our returning loyal guests along with hundreds of new ones. Your trust and confidence in us during this time means the world to us. You are the heart of our business!

We have discussed as a team a way that we could thank you and give back. We decided to offer every patient a **\$25 treatment credit towards the repair of any one tooth, available now until December 31st**. This is in addition to the generous referral rewards and patient appreciation gifts that we are currently offering! We appreciate you!

For your safety, our entire office is now protected with GPS Ionization Air Filtration!

Why **GPS Ionization** is the Preferred Choice against COVID-19

What type of virus is COVID-19?

Viruses can be generally categorized in three groups by virus structure. This affects the effectiveness of disinfectants in killing the viruses.

- **Enveloped viruses are easiest to kill.**
(An example is Influenza A Virus).
- **Large, non-enveloped viruses are more difficult to kill.**
(An example is Rotavirus).
- **Small, non-enveloped viruses are hardest to kill.**
(Examples are Rhinovirus and Norovirus).

Coronaviruses are enveloped viruses, meaning they are one of the easiest types of viruses to kill with the appropriate product. GPS has documented a kill rate on Norovirus of 93.5% in 30 minutes. Microbiologists have suggested that GPS technology would kill Coronavirus at a higher rate; however, only testing will confirm.

"A product that is likely to provide the **greatest protection to you from COVID-19** will have claims against at least one non-enveloped virus such as Norovirus..."

**THE GPS
ADVANTAGE**

-Komal K. Jain, Executive Director of the CBC

COVID-19 has helped us come back stronger and safer than ever!

It seems so long ago that we gathered our team together on March 20th and announced our temporary office closure. After many tears were wiped away, we gave them each employee some extra money and a coveted roll of toilet paper before saying our temporary good-byes.

At All About You Dental, we have always practiced universal precautions in assuming that every person that enters in the office is contagious in some way. Since reopening in May, we have implemented extra protective measures to help make our treatment environment safer than ever.

- Everyone in the office wears a safety mask all day long. We hope to be able to show our smiling faces again soon!
- Due to the backlog of appointments that had to be postponed over our closure, we now ask each patient to confirm their appointment to let us know you'll be there. Unconfirmed appointments will be made available to someone else in need.
- We will happily reappoint you if you have any flu or COVID-19 symptoms

Use 'Em or Lose 'Em: Year end insurance benefits expire December 31st.

If you haven't taken advantage of your dental insurance benefits for 2020, call our office and we will help you use them so you don't miss out!

RECIPE of the MONTH

My Grandma Clark was a gourmet cook. Back in 1999 just prior to her passing, my wife Jannie and I visited her. My Grandpa slipped us an old shoe box, packed full of her treasured recipes collected over her lifetime. Jannie and I spent the next 3 years creating a huge 357 page recipe book in her honor.

There are now 535 books in print! We decided to share some recipes with you as "Grandma's Recipe of the Month". Enjoy!

- Dr Taylor and Jayson Clark
