Boise Dentists Provide Excellent Dental Care!

Your smile is one of the first things people notice. If you want a beautiful healthy smile and exceptional dental health, visit the practice of All About You Dental. **Dr. Taylor Clark, DDS**, founder of All About You Dental, is a highly skilled dentist, author of the book, "Beating All Odds", and was voted Young Entrepreneur of the Year in 2009 by the Boise Chamber of Commerce. We also have the pleasure to have **Dr. Bryan Dille, DDS** and **Dr. Jayson Clark, DDS** in our practice. Both graduated among the top in their class, and qualified for the Dental Schools Dean's List.

Your smile says a lot about you. It reveals your sense of humor, shows affection, radiates confidence and brightens your entire face. But if you're hiding your smile because it's not as attractive or healthy as it should be, you may be sending a negative message to everyone you meet.

Fortunately, the doctors at All About You Dental can give you the beautiful, healthy smile you deserve with advanced restorative and cosmetic dentistry. Their expertise and skill can give you a smile that will not only reflect your confidence; it will reveal the very best things about you.

NEW patients welcome! Insurance is filed for you, no-interest financing is available, and all major credit cards are welcome.

Thank you for visiting our website. Feel free to call or email us if you have any questions. We look forward to serving you and your family.

PATIENT OF THE MONTH NOVEMBER / DECEMBER

Bruce Skidmore was voted patient of the month for November/December. Something unique about Bruce is he has a BS in Engineering and a BS in Nursing. He designed cooling for satellite electronics that were 30x more power than the typical aerospace electronics at the time. He started nursing school when he was 25 and finished it 35 years later. His hobbies include working with Hospice, reading, sailing, taking road trips with his wife and watching British mysteries on TV. What he loves most about our office is he always feels like he is visiting friends when he comes to our office. As a nurse, he recognized the quality care that he receives at our practice. Everyone at All About You Dental would like to thank him for being a great patient!

Grandma Clark's Recipe of the Month

NEW!! We have decided to share a special recipe with you every week on our website. Simply visit www.allaboutyoudental.com each week for a brand new recipe.

My Grandma Clark was a gourmet cook. Back in 1999 just prior to her passing, my wife Jannie and I visited her. My Grandpa slipped us an old shoe box packed full of her treasured recipes collected over her lifetime. Jannie and I spent the next 3 years creating a huge 357 page recipe book in her honor. There are now 535 books in print! I've decided to share a recipe with you each month.

-Dr. Taylor Clark

Apricot-Cranberry Meat Loaf

- 2 pounds ground beef
- 1-1/4 teaspoons salt
- 1/4 teaspoon pepper
- 1 slice stale bread or toast
- 1 egg, beaten
- 1/4 cup minced parsley
- 2 tablespoons steak sauce
- 1/2 cup hot water
- 1 beef bouillon cube
- 1/3 cup minced onion
- 8 canned apricot halves
- 4 teaspoons cranberry sauce

Dissolve bouillon cube in hot water and mix together lightly all ingredients except last two. Shape into loaf and place in 9x5x3 inch loaf pan. Press fruit halves into meat, hollow side up, and put 1/2 teaspoon cranberry sauce in center of each. Bake 50 minutes in 350 F. oven. Serves 6 to 8.

All About You Dental

Sensitive Teeth

After preparing a very generous helping of your favorite ice cream for yourself, the last thing you want is for this delectable dairy delight to cause you pain. But if cold foods like ice cream or hot drinks like coffee often cause you pain or discomfort, you may be suffering from "sensitive teeth".

Sensitive teeth can come from any number of dental dilemmas. A cavity, tooth damage, worn fillings, and gum recession are among the common causes of tooth sensitivity.

Below the enamel and outer layers of the tooth that protects the crown, is dentin, which contains the nerve endings. When the protective layer of enamel is compromised, the nerve endings can be stimulated causing pain and discomfort, though no long-term damage occurs.

Of course, the standard dental cure of regular and proper brushing and flossing is key to preventing sensitive teeth. But beyond this, sensitive teeth can be treated. Desensitizing toothpaste can help build a layer of protection between the nerve endings and your bowl of Chocolate Chip Cookie Dough ice cream.

We can also offer other treatments in the office to minimize or eliminate your pain completely.
